A Proven Winner!

PERRIE WINKLE

www.children-first.org

Exquisite, robust, vibrant flowers that bloom continuously, behaving like their namesake, Perrie, which means wanderer. Renowned for their long, thick roots that reach deep into the ground, Perriewinkles are a top performer. St. Louis Park is one of the 100 Best Communities in America for growing Perriewinkle. Multiple gardeners are preferred.

SOW in asset-fertile soil in full sun before danger of risk behavior. Cultivate young seedlings frequently and within close proximity and they will thrive. Perriewinkle seeds grow in any St. Louis Park environment. Sun or shade. Multiple doses of the 40 developmental assets should be added to the soil daily. Intentionality and repetition are key. Perriewinkles grow in clusters and flourish in the whole community, never alone.

Bloom color: A full spectrum of colors

Bloom time: All year

Spread: Community-wide

Zone: Adapts to a wide climatic range

Height: All sizes infancy to near adulthood

Best way to Propagate: Easily propagates from seeds if liberally infused with assets. Don't transplant or divide after their roots are established in St. Louis Park.
